MiLi MiTag USER MANUAL

Main Functions

1. Locate your item

The Apple® Find My™ network provides an easy, secure way to locate compatible personal items on a map using the Find My app on your iPhone®, iPad®, iPod touch®, or Mac®. Simply pair your compatible product with the Apple Find My app to view it right alongside your Apple devices. If your item ever goes missing, you can put it in Lost Mode to display a message and contact information to anyone who might find it. The Find My network is encrypted and anonymous, so no one else, not even Apple or the maker of your personal item, can view its location.

2. Play Sound

- Open the Find My app, tap the Items tab, then tap your item.
- Click Play Sound, and the device will beep, so you can find the item easily.

Quick instructions

1. Turn on the device

Press the center to activate MiTag.

2. Pair the device

- Open the Find My app.
- Hold the device close to your iPhone, tap the Items tab, tap +, and then Add another Item.
- Tap Connect.
- Type a name for your device, and select an emoji.
- Tap Agree to acknowledge that this item will be linked to your Apple ID.
- Tap Finish.

3. Enable Lost Mode

- Open the Find My app, tap the Items tab, then tap your item.
- Under Lost Mode, tap Enable.
- Read the instructions, tap Continue and enter a phone number or email address
- Confirm the information, customize the lost message, and tap "Activate" to complete the setup.

4. Remove the device

- Open the Find My app, tap the Items tab, then tap your item
- Tap Remove Item and then tap Remove to complete the operation

Note: After removing the device from the app, the device will stand by at least 6 months, and you can directly connect it anytime.

FAQ:

1. When can the device be located?

When an item is separated from its owner for a period of time, it can be found by other Apple devices that are part of the Find My network and the owner can start to get the location of the device.

2. How to confirm whether the device is powered on?

After getting the device, tear off the adhesive tape on the device, the device will beep, indicating that the device has started. The keys on this device are not used to power on or off, only to restore factory settings.

The device has a standby time of half a year after each disconnection, during which time you can directly connect and use it.

3. How is the device designed to discourage unwanted tracking?

If any Find My network accessory separated from its owner is seen moving with you over time, you'll be notified in one of two ways:

1. If you have an iPhone, iPad, or iPod touch, Find My will send a notification to your Apple device. This feature is available on iOS or iPad iOS 14.5 or later.
2. If you don't have an ios device or a smartphone, a Find My network accessory that isn't with its owner for a period of time will emit a sound when it's moved. These features were created specifically to discourage people from trying to track you without your knowledge.

4. Why I can't find device with Bluetooth connection?

Try to reset the device by long pressing the button for 3 secs. Or you can change to a new battery.

5. How to delete all information when I want to connect with a new iOS device?

Try to reset the device by long pressing the button for 3 secs.

Button Description

1. Power on

Press it (with beep)

2. Power off

Long press for 5 seconds (with beep)

3. Reset

On state, quickly press 5 times and then do not release long press until there is a beep and then release (IOS side also need to remove the item)

Battery

MiTag contains a button battery. The battery may need to be replaced during the life of the product. Replace only with batteries of the same type (CR2032) and rating, observing correct polarity.

Replacement battery:

1. Disassemble the product into two parts through the gap between the upper cover and the lower cover
2. Remove the battery.
3. Insert the CR2032 battery into the device with the positive (+) side facing up.
4. Connect the upper cover and the lower cover, and press to tight.

Safety and handling

Important safety information to handle MiTag with care. It contains sensitive electronic components, including batteries, and can be damaged, impair functionality, or cause injury if dropped, burned, punctured, crushed, disassembled, or exposed to excessive heat or liquid or to environments with high concentrations of industrial chemicals. Don't use a damaged MiTag.

Environmentally friendly disposal

Old electrical appliances must not be disposed of together with the residual waste, but have to be disposed of separately. The disposal at the communal collecting point via private persons is for free. The owner of old appliances is responsible to bring the appliances to these collecting points or to similar collection points. With this little personal effort, you contribute to recycle valuable raw materials and the treatment of toxic substances.

To use the Apple Find My app to locate this item, the latest version of iOS®, iPadOS®, or macOS® is recommended. The Find Items app on Apple Watch requires the latest version of watchOS®.

Use of the Works with Apple badge means that a product has been designed to work specifically with the technology identified in the badge and has been certified by the product manufacturer to meet Apple Find My network product specifications and requirements. Apple is not responsible for the operation of this device or use of this product or its compliance with safety and regulatory standards.
